Re: Draft Remedial Action Report
Tank T408-6 (Block 408)
University Heights III - Sites C & E
Newark, NJ

Dear Mr. Sky:

Enclosed please find a Draft copy (less appendices) of the Remedial Action Report (RAR) for the activities conducted during the removal of the underground storage tank on Block 408. As the report indicates, no elevated levels of contaminants were detected in the post-excavation soil samples, and no further actions are proposed.

Please review the report and, if acceptable, complete the two (2) certifications on page 6 and page 7. Once the certifications have been completed, please forward the original, signed and notarized pages to our office. We will prepare the final report for submittal to NJDEP under the Memorandum of Agreement (MOA).

Should you have any questions with regard to this matter please feel free to give me a call at your convenience.

Very truly yours,

James M. Clabby
Project Manager
